## **About Vertoro**

*Vertoro BV is an innovative start-up company, active in developing, producing and selling a lignocellulosic-based platform product, with ambitious goals and plans for 2021 and beyond. This technology is currently being piloted at the Brightlands Chemelot Campus and is preparing for demonstration facilities. Lignocellulosic biomass products applications under development include more sustainable types of polyurethane, phenolic resins, thermoplastics, cracker feed, and various energy products. The company is ready to enter the market with various product combinations.*
